ADVERTISE IN THE TRIBUN

The loveliest Complexions of Europe would adore this Castile for American Women

THE golden daughters of Spain -possessors of the most ravishing complexions in all Europe -use nothing but Castile for their glorious skins. And indeed the same is true of the Beauty, Fashion and Aristocracy of Europe; Castile is the one toilet soap treasured everywhere as the very standard of

perfection in a toilet soap.

Castile has had this reputation for five hundred years (since it was first made, in Castilla, a northern province of Spain). And what woman who treasures her complexion would use any other toilet soap than Castile, if she could only find in it those modern virtues that modern women want?

The virtue of Doña* Castile! A far finer Castile even than the bland jabon dure of Spain-for it is simply Castile made exquisite!

Doña will give you an instant lather even in cold water (instant tinsing too!) Dona is exquisitely molded for your hand, "hard-

III. Any traction settlement to be acceptable to the people of Chicago, after their years spent in having to deal with the transit companies through third parties, must include a provision for some form of localized control.

The traction question might have been settled sfore this had the city, through its representatives, been able to bargain directly with the

As amended by the municipalities' committee of the house of representatives, the transit commission bill considered by the legislature represents on the whole, we think, the best system of local rule that so far has been drawn up.

It provides that Cook county shall become an individual transportation district and that control of all transportation, local to the district, shall be taken from the hands of the Illinois commerce mmission and placed under a commission of five

rge a measure of power to the state through the governor. Chicago wants no more state control than it can help. As amended, the bill would grant a very fair division of power. Three of the five members would be appointed by the mayor of Chicago with the approval of the city council. One would be appointed by a majority of the county oard. One would be appointed by the governor with the approval of the senate. And the original power given the governor to control the commission's expenditures and appointments is taken

It is a just proposal, we believe.

Chicago should have a majority on the board, yet the county's interest is represented. It has been proposed that the member to be appointed by the governor be omitted and the city given four members. That would be unwise. The counties adjoining Cook county have an interest in the city and in its methods of transportation. That public schools during the last three years is the interest ought to be recognized. Unless a practical plan for direct representation by the counties interested can be devised, appointment should be by the governor.

Editorial of the Day

[South Bend (Ind.) Tribune.]

Chicago is carrying beautification too far when lets its chief of police issue an order against hobsleeping in Grant park. In the midst of the campaign to advertise the city as a summer resort a police official without a trace of the philosopher in his makeup wipes out the one thing that attracted the scholarly middle westerner to Chicago. Since the first turf was laid in Grant park it has been the haven of every willie addicted to afternoon beauty naps. Repractice to give the superintendent credit for prog-ress in the schools. One man is not responsible for improvements in our system. The cooperation of teachers and principals is behind every step and other auditory phenomena that make Chicago what it is boomed lakeward over their heads without penetrating their consciousness. Newspapers over their faces took care of the files.

It was a Homeric gesture of disdain and one that invariably turned the beholder into a philosopher In nearby Peoris, South Bend, Dubuque and Madison whose continued energy and administrative wisdom have brought the school; to their present excellent state.

In nearby Peoria, South Bend, Dubuque and Machandre and Such things could not be, for the conservative coppers in these cities cling to the quaint theory that sleeping on their principal thoroughfares is improper. But there on one of the world's busiest streets in America's second largest city the weary, penniless schools Chicago has had in years, it is this superintendent whom Mr. J. Lewis ath, playing a shrill clarinet score in the Down in George V. chorus, says that he will oust tople have become so used to the greed and orance of politics that they no longer have precious than philosophy it may do so, but that town

(Copyright: 1927; By The Chicago Tribune.) TOMATOES AS A CURE FOR PELLAGRA.

RS. GOLDBERGER AND WHEEL ER tell us that plenty of tomato juice will prevent pellagra and even will cure a certsin propor-tion of cases of the disease. It seems to be well established that proper disc will prevent and, in many cases, will ful or is needed except to relieve symp-toms; that buying medicinal cures is a waste of good money by people who, as a rule, have no excess of money to waste. These seem to be well estab-lished facts on which we can hold with confidence, while the scientists speculat

that are not so important: Tomatoes can be grown almost any where. Many soils are suited to them. The season for them is a long one. The children in the family can grow them, keep them free from insects and gather them, if the grown people are occ with other tasks. The fruit is easily preserved for use out of season. If to-matoes, added to other proper foods, will prevent and cure pellagra, let us have more of them.

Drs. Goldberger and Wheeler gave to mato juice as a beverage. The daily al-lowance of the juice which they found to prevent pellagra was somewhere between one full glassful a day (6 ounces) and one full glassful a day (6 ounces) and two and a half quarts—about seven full glasses. They used canned tomatoes and they got the juice by pouring the con-tents of the can into a cloth bag and squeezing out the juice. The pulp was not used.

The inference is that fresh, raw toma-

toes would be at least equal in value to the cooked and canned product. The rincipal part of this discovery related to the need of using enough of the juice. mato juice would not cure nor prevent the quantity drunk in a day was too small. Presumably the tomatoes could be eaten in other ways—maybe tomato and all. It may be objected that most people would tire of tomato pulp in the large allowances necessary as a pellagra

The research students also experimented with carrots and rutabaga turnips. They came to the conclusion that people could not be induced to eat enough car-rots and rutabagas to ward off pellagra, even if these vegetables in any dose had

such preventive powers.

They experimented with a daily allowance of one pound of dressed raw car-rots. These were peeled, sliced, steamed and then mashed. In the experiments with rutabagas they gave one pou day of the dressed, raw vegetable. This allowance was peeled, run through a chopper, steamed for two hours and mashed. The day's allowance was divided between dinner and supper. Now let us hope Drs. Goldberger

Wheeler will try out large allowan collards and collard juice as preventives and cures. Collards grow they stay fresh and green in the open them like to grow them and to eat them.

SPARTAN BOARD EXERCISE. A. R. C. writes: Dr. Lewin's Spartan board for setting up exercises answers the purpose, but, like many other good things, because of its inconvenience, it will not be popular and much backache will remain or accumulate. I had a de-vice for the same purpose made at a blacksmith shop from an iron rod three-quarters of an inch in diameter and thirty-three inches long, and at a cost of 75 cents. This rod was flattened three inches at each end, bent at right angles six inches, and bent again to a horizontal bar of fifteen inches. This I wrapped in strips of cotton cloth and clamped to the spring at the foot of the mattress. It depends on the thickness inch lift is enough. The horizontal bar wants to be high enough so that the feet can easily be slipped under it. The merits of this device are that it

In my own case I soon discovered I could not use it because of the strain on a small varicose aneurysm just strain on a street and at the base of the neck. There are a number of organic troubles that could be injured by strains in this exercise.

revolutionizes tooth brushing

With ordinary tooth brushing there is 35% of your tooth surfaces that you never thoroughly clean.

Your dentist can prove this to you by showing you that tartar has already be-gun to form in the unwashed places a few days after he has cleaned every The shape of the ordinary tooth brush is such that the handle interferes with

reaching the very surfaces where tartar most readily forms. When you have once tried a Clean-Be-Tween you will never buy any other tooth brush!

The Clean-Be-Tween is adjustable, reaches every surface and cleans the spaces between the teeth. Dentists everywhere prescribe the Clean-Be-Tween because, with it, up-and-down brushing, which dentists insist on, becomes easy and natural.

The handle will last a lifetime may be dropped on tile floor or sterilized in boiling water like a surgical instrument

The brush heads are removable and adjustable. Refill brushes, hard, soft or medium, may be obtained at the drug or epartment stores.

Ask your dealer to show you the Clean-Be-Tween. He is as enthusiastically in favor of it as your dentist is.

Stores in Chicago and surrounding territory announce an extraordinary Whole and Half

Ham Salc Aug. 19th to 25th

Savings for families of every size

STEP INTO your meat store today—and save money! Here is an important event—a special sale on one of the choicest summer meat foods.

And what a saving it gives you! A two-way saving. First, because ham sells for much less per pound whole or half than in any other way. Second, because numerous dealers have agreed to sell whole and half hams at especially low levels for these seven days.

If you plan meals for two

-buy a half ham. Half hams are suitable for the smallest family and assure money-saving meals of tasty variety.

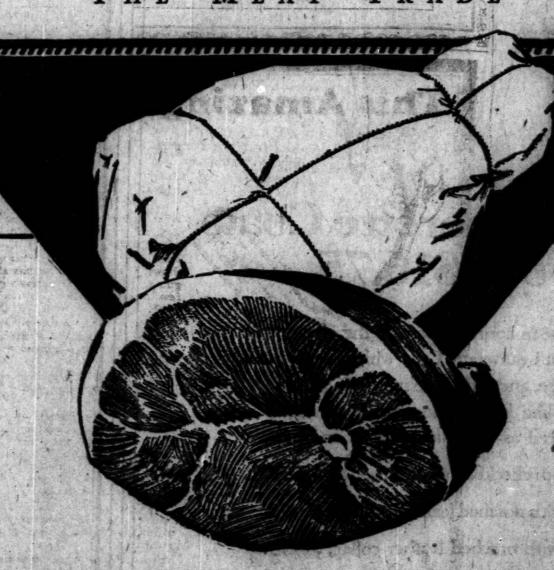

If you plan meals for three or more

-buy a whole ham and find out how delicious it is baked, boiled or fried; how useful it is cubed or minced in salads, omelets, loaves or sandwiches.

Either way—whole or half—ham is a "buy" now. Never before, in fact, have you been offered a sale like this—on a scale like this.

Ask for new, tested recipes - free at your store.

Mobiloil triump

Arthur Goebel uses Mobiloil "B" in flight to Hawaii

Again Mobiloil has played its part in the conquest of the air by a daring American aviator.

Arthur Goebel, winner of the Dole prize for a flight from San Francisco to Honolulu, used Mobiloil "B" to lubricate the Wright Whirlwind engine of his Travelair plane.

Even in a year of outstanding aeronautical feats this winning flight of 2400 miles across the open ocean will stand as a great achievement.

We are proud to have shared in its accomplishment,

No oil comes to you with such a record in aviation as Gargoyle Mobiloil.

To the North Pole. When Commander Byrd flew to the North Pole-he used Mobiloil.

Across the United States. When Lieut. Maughan flew across the United States, dawn-to-duskhe used Mobiloil.

Around the World. When the U.S. Army Fliers flew around the globe—they used Mobiloil.

With Col. Lindbergh. When Col. Lindbergh flew the famous "Spirit of St. Louis" from San Diego to New York-and then from New York to Paris -he used Mobiloil-Mobiloil is now being used in this plane on its tour around the United States.

First to Hawaii. When the U. S. Army Fliers made the first San Francisco-Honolulu flight in June of this year - they used Mobiloil.

And again to Hawaii. Now when Arthur Goebel flies to Hawaii to win the Dole prize—he uses

In every one of these events our regular stock Gargoyle Mobiloil was used. The same Mobiloil that is offered by Mobiloil dealers everywhere.

You can be sure of the same efficient and economical lubrication when you use Gargoyle Mobiloil in your car.

The Brand Is Your Insurance

There is an overproduction of crude oil. This has encouraged the opening of numerous small refineries. Many of these are operated by men unskilled in this work. The consequence is that in gasolines there is a wide variance in guality and performance.

Red Crown Ethyl is a new gasoline built upon an old, established brand. Red Crown Gasoline is the peer of any motor fuel made from pure petroleum. By adding Ethyl anti-knock compound to this splendid fuel, Red Crown Ethyl is produced.

Red Crown Ethyl does away with that annoying knock—the engine delivers a steady, smooth, flexible flow of power - it gives the car a snappy start, a quick pick-up, and enables it to attain any speed the machine is capable of developing.

It has made the high-compression engine possible - and it makes your engine perform

lake no chances with your car — fuel it with Red Crown Ethyl. The brand is your protection.

Remember carbon in your cylinders decreases the space in the firing chamber, and of course increases the compression. But to hold this compression, thus enabling the carbon to work for you, be sure that your valves are clean and are seated properly—then Red Crown Ethyl will sing you a song that will delight

Stabs the darkness for half a mile!

From within your car you can throw a 3,000-foot beam in ANY direction-front, back, right, left, up, down!

Not only is Sport-lite the largest and most powerful light of its type, but it is the easiest to operate. Your hand barely leaves the steering wheel to touch the exclusive ball control which sends a half-mile beam in any desired direction.

What's more, Sport-lite "stays put" once directed. Neither road bumps nor wind affect it. Sport-lite also has a focusing device which enables you to throw a narrow beam, inoffensive to opposing traffic, or a wide beam that floods the entire road.

Beauty and efficiency at a moderate price have made Sport-lite the largest selling light of its kind. It is now standard equipment on Packard-6, Buick, Stutz and other high-grade cars in Chicago territory. Installation cost, \$2.50; handsome onyx ball, \$2.00 extra. today to determine the new western junior golf champion.

The eastern sharpshooter, who represents the Dunkirk Country club of New York, disposed of Lawrence Moller of Quincy, III., in his semi-final in a businesslike manner and finished the scheduled eighteen hole match on the twelfth green. He was one under at a boxing match. These qualities and this popularit are what lead Tex Rickard to believ

par for the distance and on one-third of these holes beat the standard figure.

Hakes defeated Irvin Bursiek of Rockford in the quarter final, 3 and 1, after being 1 down at the turn. Moller had beaten Harold B. Cook of Toledo, 5 and 3.

Canadian Star Beaten.

Ennis won his way to the final by winning, 3 and 2, over Paul Jackson of Kansas City, who had eliminated Alex Carriek of Toronto in the quarter finals on the nineteenth hole. Ennis defeated S. E. Dean Jr. of Ruth Lake, 4 and 2, in that round.

The local contender got himself into numerous difficulties in his match.

Every club owner wishes to produce a championship baseball team. It is to his own interest, because of increased patronage and consequent profits, to do so. Charles A. Comiskey wants a winner just as much, we may assume, as does William Wrigley Jr. There are different ways of going about it. One method may be successful and another unsuccessful, as Don Marwell's implied criticism of the White Sox suggests. The public, usually patient, expects results within a limited period. To that extent it is interested in theories of management, which some might think none of its business.

Ruth Lake, 4 and 2, in that round.

The local contender got himself into numerous difficulties in his match with Jackson, but also got himself out with dispatch. He conquered two stymies in a row, on the twelfth and thirteenth.

FOREMAN TRUST & SAVINGS BANK, Chicago ILLINOIS MERCHANTS TRUST COMPANY, Chicago

From a letter of Mr. A. B. Gockenson, President of the Company, the following information is summerized:

History and Business The Inland Wire & Cable Company was incorporated in August, 1927, as the result of a consolidation of the Chicago Insulated Wire & Manufacturing Company and the Illinois Wire & Cable Company and has taken over the entire assets and business of these two corporations.

The Chicago Insulated Wire & Manufacturing Company, one of the pioneer electrical companies, founded in 1885, and the Illinois Wire & Cable Company, founded in 1912, were organized for the manufacture of bare copper wire and weatherproof cable. These products are used for the distribution of electrical current by light and power companies and by railroads, telephone and telegraph companies, the largest of which have been constant customers of each of the companies. In addition the Chicago Insulated Wire & Manufacturing Company manufactures a line of magnet, annunciator, office and radio wire.

The Inland Wire & Cable Company will continue the manufacture and distribution of wire and cable under the trademarks of the predecessor companies, which are well and favorably known throughout the trade as "1885" and "Illinois."

Plant and I acation. The plants of the con-

Plant and Location The plants of the consolidated companies, all at Sycamore, Ill., (52 miles west of Chicago) have direct switching connections with the Chicago & Northwestern, and the Chicago Great Western Railroads and are therefore well located for labor supply, transportation facilities and market centers. Modern brick buildings with automatic sprinkler equipment, have combined floor space in excess of 250,000 square feet and are well arranged for convenience in production. Machinery throughout is of modern type, much of it de-

Earnings The combined net profits of the consolidated companies as reported by Arthur Young & Company averaged for the past three years, after depreciation and Federal taxes, \$3.00 per share on the 105,000 shares of stock outstanding. On the same basis earnings for 1926 were \$4.10 per share and earnings for the first five months of 1927 are at the annual rate of \$5.10. These figures do not reflect the benefits which will accrue through the consolidation. Dividends. It is the intention of the Board of Directors to establish dividends at the rate of \$2.00 per share per year, psyable 50 cents per share quarterly.

Purpose of Issue The present issue of stock was sold to the bankers in connection with the consolidation of the Chicago Insulated Wire & Manufacturing Company and the Illinois Wire & Cable Company and represents no new money in the business.

Future of the Business The sales of both companies have steadily increased, the growth particularly marked since 1919. As great strides are being made in the inter-connection by transmission lines of towns and cities, and the rural electrical development work is in its infancy, it can be reasonably expected that the demand for these products will continue to increase.

Management The management of the Inland Wire & Cable Company will remain in the hands of the executives who have been responsible for the success of the predecessor companies. The bankers are represented on the Board of Directors.

YESTERDAY'S AVERAGES

[Chiese Tribuse Press Service.]

New York, Aug. 18.—[Special.]—
The stock market today showed evidence of duliness, traceable to a shortage in the speculative buying which was a big factor in trading earlier in the week. The general list of stocks was moderately firm, however, and a number of issues, especially the rails, advanced briskly.

The industrial group was notably quiet. Facts were produced to show that this respite from the recent rapid advance was the natural outcome of the approach of the market to the high level of three weeks ago. A compliation showed that the average prices of 100 representative stocks have recovered 75 per cent of the setback.

ctom turns to power.

What Extra Means

Does not vaporize completely + thurns wet + + + gives less power + + leaves greasy residue to dilute crenkcese oil.

The outstanding superiority of 400 "Batra Dry" Gase-line is due to a revolutionary change in the process of refining ''' reducing the "end point" to 400° ''' taking only the most volatile parts ''' producing LESS but much FINER gasoline from the crude. As a result, Shell Gasoline is EXTRA DRY '' unusually free from heavy, greasy, carbon-bearing elements. It vaporizes completely, ignites instantly, burns cleanly, leaving no unburned residue to dilute the oil in the crankcase. It is a quality product ''' alive with power ''' more expensive to produce but costs you no more than the redinery kind.

For motors of the high-compression type, there is nothing to equal SUPER-SHELL . . . the superlative gesoline that sells at 3c a gallon more

Every motorist is familiar with the evils of excess carbon. But not everyone knows that carbon can be checked in advance by the selection of an "extra dry" gasoline and a "golden clear" motor oil to use with it.

Both the character and the condition of the crankcase oil influence the amount of carbon deposited. If the fresh oil put into a caralready contains excess natural carbon, an excess deposit of carbon in the motor surely will result. If a "wet" gasoline, containing greasy particles is used, the motor oil will be diluted quickly, and carbonization will take place freely.

The secret of checking carbon, therefore, does not lie wholly in the use of an "extra dry" gasoline or of a "golden clear" motor oil but in the combination of both. Then, each will supplement the virtues of the other to give a new sensation of power > > a new thrill to driving . . . a new freedom from carbon and its attending evils.

-The Anti-Carbon Pair

400 "Extra Dry" Shell Gasoline and Golden Clear Shell Motor Oil are the "anti-carbon pair" * * * scientifically refined to go and work together. 400 "Extra Dry" Shell Gasoline burns completely because it vaporizes completely * ? ? leaving no greasy residue to injure the crankcase oil. Golden Clear Shell Motor Oil contains the lowest possible amount of carbon, and when used with 400 "Extra Dry" Shell Gasoline deposits less carbon than heretofore had been thought possible.

Why take chances with your car? Why run the risk of trouble, damage, repair bills and untimely depreciation * * * when 400 "Extra Dry" Shell Gasoline and Golden Clear Shell Motor Oil are so conveniently available at Shell Yellow-Red Service Stations, and cost no more than the ordinary kind?

Legionnaires are expected to establish the identity of many of the 3,125 American dead who lie in unmarked graves. American grave registration officials here hope that the legionnaires, revisiting battlefields on American sectors, will be able to point out places where comrades were killed beside them, and in this way to permit searchers to dig in the shell scarred ground and uncover the bodies.

The recent finding of Lieut. William Sheehan of Washington, D. C., and the six men who died around him while the American army was advancing on the German crown prince's headquarters on Montfaucon, was made possible by the guidance of a German officer, visiting the scene of the battle.

sible test of the Volstead act ever held—a tug of war between the wets and the drys.

It all began when two politicians, one a scofflaw and one who never tasted a drop in his life, got into an argument at the city hall. The tectotaller argued that hootch weakens one's physique and the scofflaw scoffed. He'd pick twelve he-man tipplers, he said, who could outpull any dozen wowsers. And so the tug of war was arranged.

for the youngsters, and they are not at all like ours. They are the standards for half primitive, growing crea-tures who cannot conform in every di-rection without denying their origin.

To be sure, we want our children to be well coordinated. We don't want them to be utterly out of adjustment with their environment—to be wild and uncontrolled. But occasional lapses from conformity are perfectly natural for every lively normal child. Goodness knows, grown people have enough of hem. Then, why should we expect so much more from the we expect so much more from the children? We must allow them what d in statistics a margin of error.
